1 ACKNOWLEDGEMENT

I would like to express my sincere thanks and gratitude to Saurabh Sir for letting me work on this project. I am very grateful to him for his support and guidance in completing this project.

I am thankful to my parents as well. I was able to successfully complete this project with the help of their guidance and support. Finally, I want to thank all my dear friends as well..

2 INTRODUCTION

A health system, also known as health care system or healthcare system, is the organization of people, institutions, and resources that deliver health care services to meet the health needs of target populations.

3 20th Century Public Health

These are the following reasons why our health sector has been improving :

- Vaccination to reduce epidemic diseases
- Improved motor vehicle safety
- Safer workplaces

- Control of infectious diseases
- Decline in death from cardiovascular disease
- Food Safety
- Improvements in maternal and child health
- Family planning
- Fluoridation of drinking water
- Reductions in prevalence of tobacco use

4 Evolution of technologies

The following are ten technological advancements in healthcare that have emerged over the last ten years.

- The electronic health record. ...
- mHealth. ...
- Telemedicine/telehealth. ...
- Portal technology. ...
- Self-service kiosks. ...
- Remote monitoring tools. ...
- Sensors and wearable technology. ...
- Wireless communication.

4.1 Conclusion

Today, thanks to technology, there is better and more accessible treatment for a wide variety of diseases, better and more efficient care for the sick, and better health care and disease control. Experts agree that forecasting the future of healthcare technology isn't difficult-machine learning, artificial intelligence (AI), cloud technologies that apply to clinical, workplace, and financial processes will have better and richer incorporation into the industry.
